

Trash Data Dive 2021

Purpose

The Trash Data Dive is an annual forum for data scientists, environmental planners, land use experts, and advocates for environmental justice to discuss and collaborate on trash data & policy. The goal of the Data Dive is to use trash data effectively to drive improved and equitable social and environmental outcomes.

Participate in breakout groups on:

- Assessing trash amendment data collection strategies
- Machine learning to make trash data clean
- Developing a trash story ecosystem
- Trash education & outreach

Join us for this entirely virtual event!

October 28–29th, 2021

9:30am–3:00pm PDT (UTC–7)
